RESIDENT NOTICE

Interior pest control is included for your home

RESORT
PEST CONTROL

Your community has contracted Resort Pest Control for routine interior pest control. If you see **live** pests from the list below inside your unit, let us know and a licensed technician will schedule a visit to inspect and treat it.

No charge to homeowners

Seeing live pests inside? Here's what to do

1

Call our office

Let us know you're seeing live pests in your unit.

239-352-4100

2

Tell us what you see

Your unit number, which pest, and where you saw it alive.

3

We schedule a visit

We'll set up a time that works for you.

What's covered

Live activity inside your unit from:

- Roaches: American, German, brown-banded, Oriental and smokey-brown
- House ants
- House crickets
- Silverfish
- Spiders
- Earwigs

Live activity only

Dead insects found on their own, and treatments just to prevent pests, aren't included.

Pests not on the list above, such as rodents, termites and bed bugs, aren't part of the interior program. Call us and we'll go over your options.

Helpful tips

- Report live activity early, when it's easier to treat
- Keep food sealed and wipe up crumbs and spills
- Fix leaks; many pests are drawn to moisture
